Dear Mr Justin Vermillion

RE : Usage and Performance of Envirotac SC (ESC)

I am happy to say that we have used and will continue to use Envirotac SC in all our projects in Malaysia and the region.

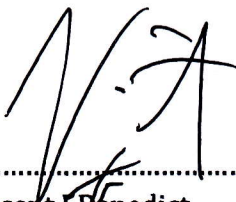

Clients have commented on the ease of use of ESC and the performance has far exceeded their expectations. They are used to the other stabilizers in the market which were expensive and broke down easily.

We have stabilized roads not only in Malaysia but in Laos as well. Clients from Philippines, Sri Lanka, Indonesia, Timor Leste and Vietnam will be placing their orders soon based on the performance of ESC.

We have also undertaken Hyroseeding projects using ESC and the performance is fantastic.

We will continue to promote and use ESC in this region. I will not hesitate to recommend ESC to anyone who needs good cost effective roads. Thank you.

Best Regards,

.....
Vincent J Benedict
